

## FREQUENTLY ASKED QUESTIONS

The following is a quick reference regarding problems that may arise when getting ready for a performance.

<i><b>Problem</b></i>	<i><b>Solution</b></i>
<b>What goes on first, the costume or the makeup?</b>	Put your costume on first, especially if it has to go on over your head. Not only will you avoid smearing your makeup, you won't mess your hair.
<b>How do I keep makeup off my costume?</b>	Before you start applying makeup, tuck a cloth or paper towel inside your collar to resemble a bib. It keeps makeup off your costume and protects you from accidents like makeup spills.
<b>What foundation is best for me?</b>	Buy both cream and pancake foundation and experiment. Depending on the type of performance, one might work better than the other.
<b>My skin keeps breaking out. What can I do to stop it?</b>	Cleanse your face before you apply makeup. Wash your face thoroughly after all makeup is removed. Purchase hypoallergenic makeup if the problem persists.
<b>My rouge is not applying evenly.</b>	Practice applying rouge on the top of your hand. Once you have found a desired consistency, try applying it the same way on your face. Wash your brushes. Previously applied rouge might be trapped in the bristles.
<b>My eyebrows look unnatural. How do I fix this?</b>	When penciling in eyebrows, use short, quick pencil strokes, following the natural shape of the brow. Use the average length of your eyebrow hair for stroke length.
